Q4 — HTML Tables Practical

MCA Full Stack Development Lab Report

Objective: Create and style HTML tables for student marks and a weekly computer lab schedule, demonstrating table headings, body rows, a footer, and merged cells.

Technologies: HTML5 and CSS3. Browser screenshots supplied by the student are included as evidence.

1. Practical Overview

The page displays an MCA Student Marks heading, a Semester 1 Result section, a Student Marks Table, and a Computer Lab Timetable. The screenshots show dark-blue table headings, pale alternating row backgrounds, borders, spacing, and a light page background.

2. HTML Concepts

Element / Attribute	Purpose
<table>	Creates a table.
<caption>	Provides a descriptive title for a table.
<thead>	Groups table heading rows.
<tbody>	Groups the main data rows.
<tfoot>	Groups a footer or summary row.
<tr>	Creates a table row.
<th>	Creates a header cell.
<td>	Creates a standard data cell.
colspan="3"	Makes the Total Students label span three columns.
rowspan="2"	Makes HTML Lab occupy two rows in the timetable.
colspan="2"	Makes Project Workshop occupy two time columns.
scope="col" / scope="row"	Identifies column/row headers for accessibility when included in the HTML.

3. CSS Concepts

• **font-family** sets the typeface.

• **background-color** and **color** set background and text colors.

• **margin** controls outside spacing; **padding** controls space inside cells.

• **border** draws cell boundaries; **border-collapse: collapse** combines adjacent borders.

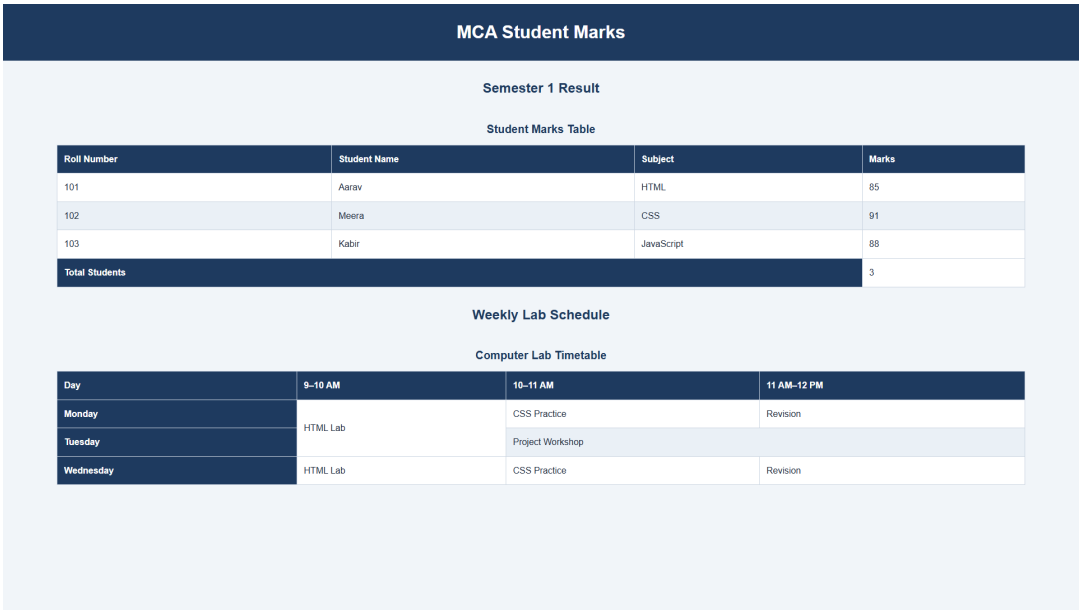

• **width** controls table width; **text-align** aligns text.

• **tbody tr:nth-child(even)** provides alternating row shading.

• **tbody tr:hover** changes a row's background while the pointer is over it.

4. Browser Evidence

The following screenshots were provided by the student and document the rendered page and both table areas.

MCA Student Marks

Semester 1 Result

Student Marks Table

Roll Number	Student Name	Subject	Marks
101	Aarav	HTML	85
102	Meera	CSS	91
103	Kabir	JavaScript	88
Total Students			3

Weekly Lab Schedule

Computer Lab Timetable

Day	9–10 AM	10–11 AM	11 AM–12 PM
Monday	HTML Lab	CSS Practice	Revision
Tuesday		Project Workshop	
Wednesday	HTML Lab	CSS Practice	Revision

Figure 1. Full-page browser view with the student marks table and lab timetable.

Browser Evidence (continued)

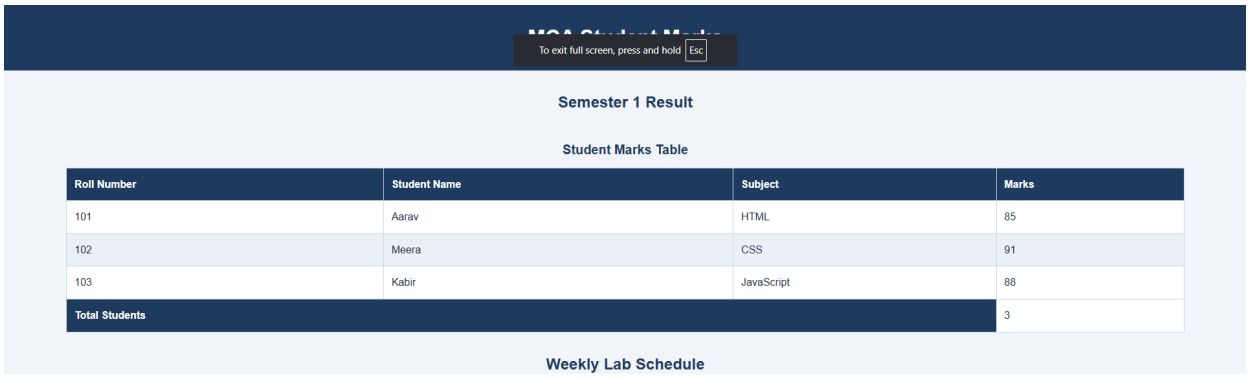

Figure 2. Student Marks Table, including the Total Students footer.

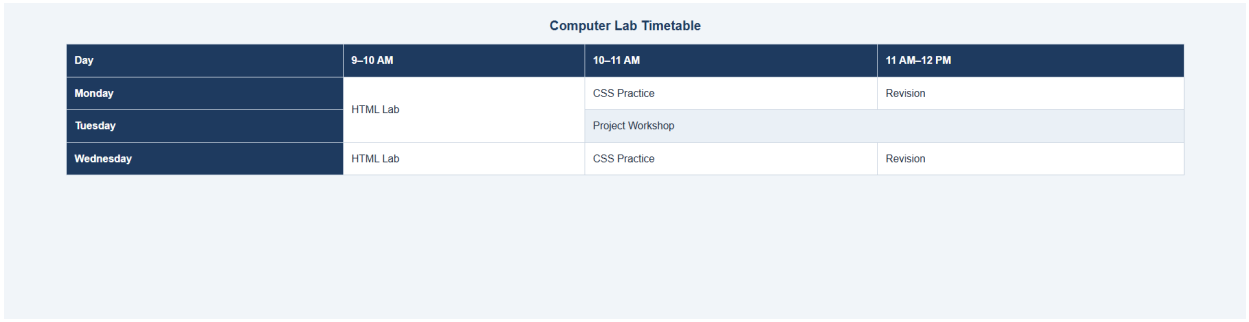

Figure 3. Computer Lab Timetable showing merged cells.

5. Result

The screenshots show both tables rendered in the browser. The marks table contains three example student records and a Total Students footer. The timetable visibly demonstrates a merged HTML Lab cell across two days and a Project Workshop cell spanning two time slots. Automated validation was not performed.

6. Submission Checklist

■ Confirm tables.html and style.css are saved and match the browser output.

■ Keep all three screenshots in the screenshots folder.

■ Review this PDF and the context notes.

■ Commit and push the Q4 folder to the existing GitHub repository.
