HTML & CSS ASSIGNMENT

A1 — BCA Academic Marksheet

Practical Report and Browser Output Evidence

Assignment	A1_Marksheet
Main file	index.html
Stylesheet	style.css
Output	Six-semester sample academic marksheet
Tools	Visual Studio Code, HTML5, CSS3, web browser

Note: This report documents a fictional academic marksheet created for practice. It is not an official university document.

1. Objective

To create a structured, readable academic marksheet using HTML and CSS, including student details, semester-wise subject tables, semester totals, a final result summary, signature placeholders, and a print-friendly layout.

2. Files and Structure

A1_Marksheet/
■■■ index.html — page structure and sample marks data
■■■ style.css — visual design, responsive layout, and print styles
■■■ README.txt — assignment description and concepts demonstrated

3. HTML Concepts Demonstrated

• **Document metadata:** doctype, language, character encoding, viewport, page title, and description.

• **Semantic sections:** header, main, section, and footer.

• **Tables:** table, tr, th, td, thead, tbody, and tfoot.

• **Grouping and hierarchy:** headings, paragraphs, and nested sections.

• **Content:** student information, six semester records, totals, final result, and signature placeholders.

4. CSS Concepts Demonstrated

• Universal selector and box-sizing.

• Typography, text alignment, colors, borders, margins, and padding.

• Centered maximum-width container and table styling.

• Alternating table-row backgrounds.

• Flexbox layout for signature blocks.

• Responsive media query for narrower screens.

• Print media rules and A4 landscape page settings.

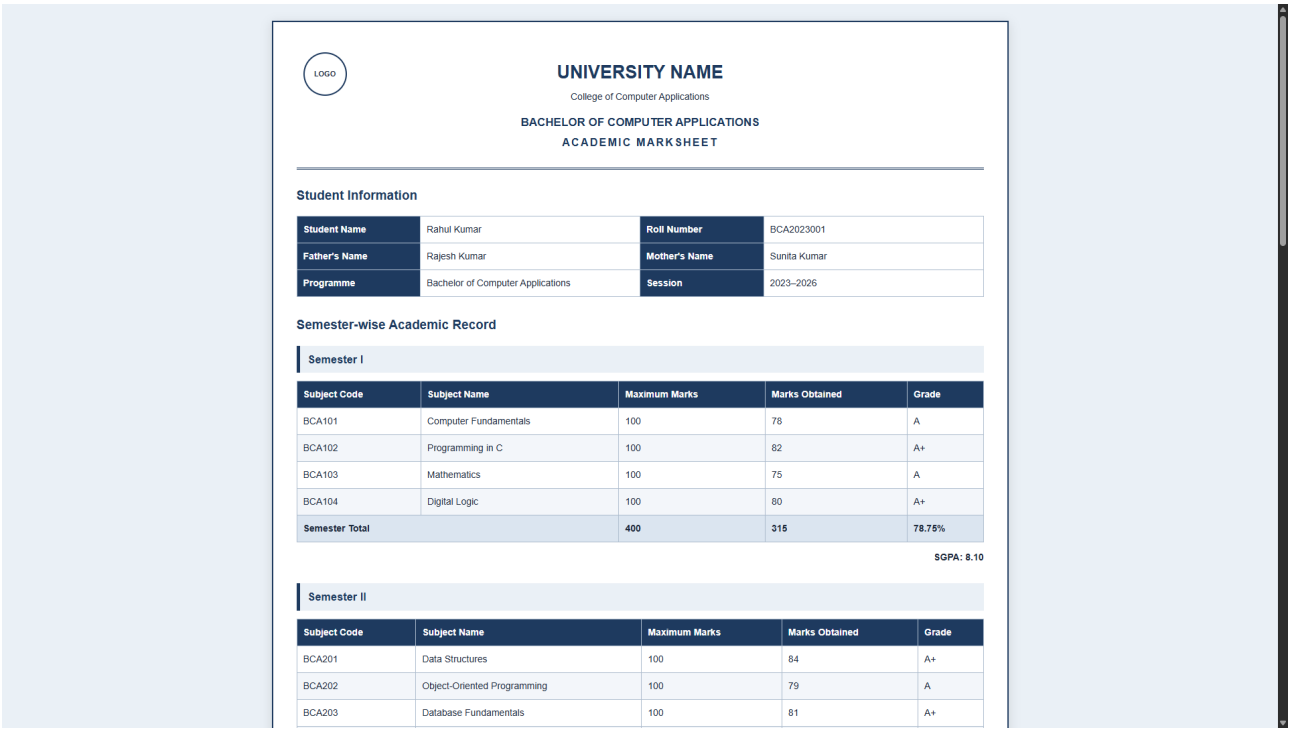

5. Sample Result Verification

Semester totals shown in the HTML: Semester I = 315/400; II = 320/400; III = 334/400; IV = 328/400; V = 341/400; VI = 354/400. The total obtained is 1,992 out of 2,400, giving 83%. The SGPA/CGPA values are sample values rather than values calculated from an official grading scheme.

6. Testing and Output

The supplied browser screenshots show the page rendered with the university heading, student information, semester tables, totals, final result summary, signature placeholders, and footer. The screenshots are included below as evidence of the displayed output.

Final Result	**PASS**

Class Coordinator / HOD

Controller of Examination

This is a sample academic marksheet created for an HTML and CSS practical assignment.

All student names, marks, grades, and results are fictional.

Figure 4. Final result summary, signature areas, and footer.

7. Conclusion

The A1_Marksheet practical demonstrates how HTML tables and semantic page structure can be combined with CSS to produce a formatted academic marksheet. Responsive and print styles improve usability on different screen sizes and in print preview.

Submission reminder: Replace fictional details only if your instructor requires different sample data. Do not present this practice page as an official marksheet.
