MCA FULL STACK DEVELOPMENT

Practical Report — Question 2

Images, Anchors (Hyperlinks) & Division

Course	MCA IBM — 1st Semester
Subject	Full Stack Development (CAPCMC105T)
HTML file	media-links.html
CSS file	style.css

1. Objective

To create an HTML webpage demonstrating images, internal and external hyperlinks, div containers, IDs, classes and basic CSS styling.

2. Software and Files Required

Visual Studio Code; a modern browser such as Chrome; Live Server (recommended); media-links.html; style.css. The supplied first version uses remote images, so an internet connection is required unless images are saved locally.

3. HTML Concepts

<html lang="en">: root element and document language. **<head>** contains metadata and linked resources; **<meta>** declares character encoding and viewport; **<title>** sets the browser-tab title; **<body>** contains visible content.

** :** generic container grouping header, navigation, content, gallery, resources and footer.

<img>: embeds an image. **src** gives its path, **alt** describes it, and **width/height** declare dimensions.

<a>: creates a link. **href="#gallery"** targets the element with **id="gallery"**. **target="_blank"** requests a new tab/window; **rel="noopener noreferrer"** adds protective link behavior.

id identifies a specific element; **class** is reusable for styling. **<h1>**, **<h2>**, **<h3>** and **<p>** organize headings and paragraphs.

4. CSS Concepts

Element selectors such as **body** set base typography and colors. Class selectors such as **.content** style groups of elements. **padding** is inner spacing; **margin** is outer spacing. **max-width** limits width; **border** and **border-radius** add outlines and rounded corners. **display:inline-block** lets cards sit side by side. **object-fit:cover** fills the image area and can crop it. **:hover** styles pointer interaction. **@media** adapts the layout to narrower screens.

5. Complete Source Code — media-links.html

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Images and Hyperlinks Practical</title>
    <!-- Connect the external stylesheet -->
    <link rel="stylesheet" href="style.css">
</head>
<body>
    <!-- Header section -->
    <div id="top" class="header">
        <h1>Images, Hyperlinks and Divisions</h1>
        <p>Learning the basics of HTML web pages</p>
    </div>

    <div class="navigation">
        <a href="#introduction">Introduction</a>
        <a href="#gallery">Image Gallery</a>
        <a href="#resources">Resources</a>
    </div>

    <div id="introduction" class="content">
        <h2>Introduction to Web Development</h2>
        <p>HTML provides the structure of a webpage. Images make content more visual, while hyperlinks connect users to other pages and resources.</p>
        <p>This practical demonstrates images, internal links, external links, div elements, IDs and CSS classes.</p>
    </div>

    <div id="gallery" class="content">
        <h2>Image Gallery</h2>
        <div class="image-card">
            <img src="https://images.unsplash.com/photo-1515879218367-8466d910aaa4?auto=format&fit=crop&w=900&q=80"
                 alt="Computer screen showing programming code" width="600" height="350">
            <h3>Programming and Coding</h3>
            <p>Programming is used to build software and websites.</p>
        </div>
        <div class="image-card">
            <img src="https://images.unsplash.com/photo-1498050108023-c5249f4df085?auto=format&fit=crop&w=900&q=80"
                 alt="Laptop and workspace used for web development" width="600" height="350">
            <h3>Web Development Workspace</h3>
            <p>A workspace for writing and testing code.</p>
        </div>
    </div>

    <div id="resources" class="content">
        <h2>Useful External Resources</h2>
        <p>Visit <a href="https://developer.mozilla.org/en-US/docs/Learn_web_development"
                    target="_blank" rel="noopener noreferrer">MDN Web Docs</a>
           to learn more about web development.</p>
        <p><a href="#top">Back to the top of this page</a></p>
    </div>

    <div class="footer">
        <p>HTML Practical — Question 2</p>
    </div>
</body>
</html>
```

6. Complete Source Code — style.css

```
/* Overall webpage */
body {
    font-family: Arial, sans-serif;
    background-color: #f1f5f9;
    color: #1e293b;
    margin: 0;
    line-height: 1.6;
}

/* Header */
.header {
    background-color: #1e3a5f;
    color: white;
    text-align: center;
    padding: 30px 15px;
}

/* Navigation links */
.navigation {
    background-color: #0f172a;
    padding: 15px;
    text-align: center;
}

.navigation a {
    color: white;
    text-decoration: none;
    margin: 0 12px;
    font-weight: bold;
}

.navigation a:hover {
    text-decoration: underline;
}

/* Main content containers */
.content {
    max-width: 900px;
    margin: 25px auto;
    padding: 22px;
    background-color: white;
    border: 1px solid #cbd5e1;
    border-radius: 8px;
}

/* Image cards */
.image-card {
    display: inline-block;
    vertical-align: top;
    width: 45%;
    margin: 1%;
    padding: 1%;
    background-color: #f8fafc;
    box-sizing: border-box;
}

.image-card img {
    display: block;
    width: 100%;
    height: 220px;
    object-fit: cover;
    border-radius: 6px;
}

.image-card h3 {
    color: #1e3a5f;
}

.content a {
    color: #075985;
}

/* Footer */
.footer {
    background-color: #1e3a5f;
    color: white;
    text-align: center;
    padding: 15px;
}

/* Small screens */
@media (max-width: 600px) {
    .content {
        margin: 15px 10px;
        padding: 15px;
    }

    .image-card {
        display: block;
        width: 100%;
        margin: 10px 0;
    }

    .navigation a {
        display: inline-block;
        margin: 5px;
    }
```

```
}
```

7. Output Screenshot

INSERT ACTUAL BROWSER SCREENSHOTS HERE

Run media-links.html in Chrome using Live Server. Capture the header, image gallery and links sections. Insert genuine screenshots before submitting.

No browser screenshot was provided during preparation; this placeholder is intentional.

8. Testing Checklist

- ■ Both images load and include src, alt, width and height.
- ■ Internal links jump to the correct sections.
- ■ MDN Web Docs opens in a new tab.
- ■ Back-to-top link returns to the header.
- ■ Divs, IDs and classes are used.
- ■ Narrow-screen layout remains readable.
- ■ Actual screenshots replace this placeholder.

9. Result

This draft documents the proposed implementation. Complete browser testing and insert genuine output screenshots before treating the practical as ready for submission.

Submission status: DRAFT. Confirm the code matches your local files and test the images and links before submitting.
